To whom it may concern

Letter of recommendation for a semester abroad

Within our winter term projects, "Workflows Digital Signage / Digital TV and "Streaming Media" in the year 08/09 at the Media University I observed Mr. Martin Andreas Wörz to be a particularly committed student.

His job performance, motivation and innovative collaboration in both projects, are identified above for how he takes responsibility in work. His work output are high-quality results based on his far above the average workload. His depth of knowledge of IT and Linux systems are based on the previous education as an IT specialist and further studies of english literature and working on IT projects for his clients.

His ability to present technical issues in an easily understandable way makes him particularly suitable for teamwork. In addition he convinced us by easily understandable work documentations in English.

As the result of this, we, the Media University Stuttgart hired him since April 09 as an IT assistant and engineer in our Web 2.0- TV project pier111.tv until he starts his internship.

Regarding all of this, I think Mr Wörz is very well suited for an internship in IT works, especially abroad. I can definitely recommend him to work for you.

At the return of his internship abroad, we are looking forward to observe the results.

Yours sincerely

Professor Holger Nohr
Director of Information Systems
