To Whom It May Concern:

As an introduction, in my normal position, I am the Chief Information Security Officer of the Legislative Data Center, in the State of California. I am in Germany for 1 year as a part of my military duties.

After several recent conversations I am pleased to recommend Martin Andreas Woerz as an competent English-speaker.

In several conversations with him, both on the phone and in person he has demonstrated a reasonable and functional command of the English language. Our discussions have been on a broad range of topics, from cooking and travel to computers and engineering. In technical discussions his command of the language is very good. Most importantly, he recognizes his own limitations and is not hesitant to ask the right questions.

I currently employ student interns in a technical capacity and would, without hesitation, have him work for me if the opportunity arose.

If you have any questions, please do not hesitate to contact me.

Sincerely,
Lee Vigue
